Believing that the key to the future may well lie in the past, Robert Redford along with eight companions set out to follow the legendary outlaw trail. Winding from Montana down through Utah Colorado, Arizona, and into New Mexico, the trail was used by outlaws as they fled to certain escape to their fortress like hideouts at hole in the wal, Browns park and robbers roost, leaving the law far behind in a maze of canyons and dizzying mountain passes. Retracing the paths blazed by the outlaws, Redford and his party ride up narrow ravines, across wild plains and through ghost towns to the hideouts of Butch Cassidy , The McCarty brothers, Cleophas Dowd, Mexican Joe, and the Bassett sisters .Redford brings this historic part of the west into vivid focus as he takes you on a personal journey through time where the romance of the past is set against the present day intrusions of industrial development. In conversations with todays ranchers and cowboys, some of them descendants of the fiercely individualistic outlaws. Redford learns of their struggle to hold out against progress in an effort to preserve the land that is so much part of them. These men and women make us realize what a fragile link we have with our Western heritage and why it is.
